

NEPTUNE INVITES INDUSTRY PROFESSIONALS TO JOIN OUR RESEARCH AND DEVELOPMENT TEAM

As a Diving Professional you know what the market wants, but who is really listening?

Three years ago we started down this path during development of the Dry Ice Tech wetsuit with our first NEPTUNE RESEARCH AND DEVELOPMENT TEAM project. This project proved incredibly productive, designs were tweaked based on this broad feedback received from many divers in the field until we finally produced a suit that has been heralded as the warmest 7mm one piece wetsuit in the market.

After totally revamping the ever popular Sharkskin range we are now refocusing on future wetsuit development and have decided to broaden our NEPTUNE RESEARCH AND DEVELOPMENT TEAM to include all industry professionals. If you are a working Dive Master, Dive Control Specialist, Instructor, Dive Centre Retail Manager or Core Dive Centre Staff we welcome you to join our team.

Application is simple; please see the attached NEPTUNE RESEARCH AND DEVELOPMENT TEAM application form. Once completed your application can be emailed / faxed to the contact details on the bottom of the application form. Subject to application approval by Neptune you will be sent your own unique NEPTUNE RESEARCH AND DEVELOPMENT TEAM number.

To launch this program all accepted members will be eligible to receive a substantial discount off selected current wetsuit models. Additionally at no extra charge we will add a pocket to your wetsuit as we know from the Dry Ice Tech R&D project you will value this for any training or guide materials you may wish to carry. Importantly all suits will carry the NEPTUNE RESEARCH AND DEVELOPMENT TEAM logo along with additional reflective swatches so you can be clearly recognised both in and out of the water as an Industry Professional and part of the NEPTUNE RESEARCH AND DEVELOPMENT TEAM. Finally you will also receive a free NEPTUNE RESEARCH AND DEVELOPMENT TEAM T Shirt.

Then it's over to you. We want you to dive our wetsuits and tell us what you think. We will soon launch a Facebook page for team members to openly discuss their experiences with Neptune Wetsuits and other products, make suggestions and share some fun images of Neptune wetsuits and other Neptune products in action. Our entire Research and Development Team including designers and production staff will interact regularly with Team Members to encourage some great discussions on ideas that will then flow through to our future development. Obviously we can't guarantee to implement all ideas however we promise to listen and implement as many ideas as possible. We believe that this forum will also provide a unique opportunity to update all Industry Professionals on new developments and provide members with special pre-release offers. We will also run some fun competitions adding additional value to members.

As an Industry Professional we understand you have a high level of product knowledge – as a member of the NEPTUNE RESEARCH AND DEVELOPMENT TEAM we will ensure you are kept informed and we will also offer additional professional development opportunities.

Neptune wetsuits are proudly Australian Designed and Australian Made and our goal is to ensure that all Australian Dive Industry Professionals can access the best possible product for their own use as well as the use of the clients they service.

We want you to join the NEPTUNE RESEARCH AND DEVELOPMENT TEAM today and become part of an exciting new future in product development.

Warmest Regards

The Neptune Team
